## NEWSTAR KVM EXTENDER

Model:  
NS560UTP/PRO

## FCC Information

This is an FCC Class A product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

## RoHS

This product is RoHS compliant.

## SJ/T 11364-2006

The following contains information that relates to China.

部件名称	有毒有害物质或元素					
	铅	汞	镉	六价铬	多溴联苯	多溴二苯醚
电器部件	●	○	○	○	○	○
机构部件	○	○	○	○	○	○

○: 表示该有毒有害物质在该部件所有均质材料中的含量均在SJ/T 11363-2006规定的限量要求之下。

●: 表示符合欧盟的豁免条款，但该有毒有害物质至少在该部件的某一均质材料中的含量超出SJ/T 11363-2006的限量要求。

×: 表示该有毒有害物质至少在该部件的某一均质材料中的含量超出SJ/T 11363-2006的限量要求。

## **User Notice**

All information, documentation, and specifications contained in this manual are subject to change without prior notification by the manufacturer. The manufacturer makes no representations or warranties, either expressed or implied, with respect to the contents hereof and specifically disclaims any warranties as to merchantability or fitness for any particular purpose. Any of the manufacturer's software described in this manual is sold or licensed *as is*. Should the programs prove defective following their purchase, the buyer (and not the manufacturer, its distributor, or its dealer), assumes the entire cost of all necessary servicing, repair and any incidental or consequential damages resulting from any defect in the software.

The manufacturer of this system is not responsible for any radio and/or TV interference caused by unauthorized modifications to this device. It is the responsibility of the user to correct such interference.

The manufacturer is not responsible for any damage incurred in the operation of this system if the correct operational voltage setting was not selected prior to operation. PLEASE VERIFY THAT THE VOLTAGE SETTING IS CORRECT BEFORE USE.

## **Package Contents**

---

The KVM Extender package consists of:

- 1 KVM Extender (Local Unit)
- 1 KVM Extender (Remote Unit)
- 1 Custom KVM Cable (1.8 m)
- 1 Power Adapter
- 1 Rack Mount Kit
- 2 Grounding Wires (1.2 m)
- 1 User Manual\*
- 1 Quick Start Guide
- 1 Grounding Information Card

Check to make sure that all the components are present and that nothing got damaged in shipping. If you encounter a problem, contact your dealer.

Read this manual thoroughly and follow the installation and operation procedures carefully to prevent any damage to the unit, and/or any of the devices connected to it.

## About this Manual

---

This User Manual is provided to help you get the most from your system. It covers all aspects of installation, configuration and operation. An overview of the information found in the manual is provided below.

**Chapter 1, Introduction,** introduces you to the system. Its purpose, features and benefits are presented, and its front and back panel components are described.

**Chapter 2, Hardware Setup,** describes how to set up your installation.

**Chapter 3, Operation,** explains the fundamental concepts involved in operating the unit.

**An Appendix,** provides specifications and other technical information regarding the unit.

## Chapter 1 Introduction

### Overview

---

The NewStar KVM Extender allows access to a computer system from a remote console (keyboard, monitor, and mouse). It is perfect for factory and construction sites, or any type of installation where the console needs to be in a conveniently accessible location, but you want the system equipment to reside in a safe place – away from dust, dirt, and harsh environmental influences.

The unit is also useful for control and security purposes, since you can store the system unit in a secure area at the same time that you put the console in a location that offers convenient access.

The NewStar KVM Extender provides the ideal means to access the remote system box, since it improves on previous designs by using compact, inexpensive Cat 5 cable – the kind commonly used in Ethernet networks – instead of bulkier, more expensive, standard cables. Cat 5 makes for a much neater, more convenient, more reliable data transfer connection.

A key feature of the unit is built-in 8KV ESD protection and 2KV surge protection. It also features a custom ASIC that ensures the utmost in reliability and compatibility. It senses the distance to the system and automatically adjusts the gain to compensate.

Setup is as easy as can be – simply connect the computer system box and local console to the Local module, run the Cat 5 cable to the Remote module (Up to 150 meters away); and plug the remote console into the Remote Module.

---

**Note:** You can control numerous remote systems from a single console by combining the extender with a KVM switch.

---

## Features

---

- Cat 5 (or higher) cable to connect the Local and Remote Units – up to 150 m apart
- Dual console operation – control your system from both the local and remote PS/2 keyboard, mouse and monitor consoles
- Pushbutton selection of the active console
- High resolution video – up to 1280 x 1024 @ 60 Hz
- Supports VGA, SVGA, and Multisync monitors – local monitor supports DDC; DDC2; DDC2B
- Supports Microsoft Intellimouse and the scrolling wheel on most mice
- Automatic gain control – automatically adjusts signal strength to compensate for distance
- Built-in 8KV ESD protection and 2KV surge protection
- Built-in ASIC for greater reliability and compatibility
- Local unit takes its power from the computer – external power is only required when the power from the local computer/computers in the KVM installation is insufficient\*
- Rack mountable

---

**Note:** If you choose to purchase a power adapter for use with the extender , be sure to get one with the same specifications as the one provided in this package for the remote unit.

---

## Requirements

---

### Console

- \* A VGA, SVGA, or Multisync monitor capable of the highest resolution that you will be using on any computer in the installation
- \* A PS/2 keyboard
- \* A PS/2 mouse

---

**Note:** 1. If you connect a DDC type monitor to the Local Unit, the monitor that connects to the Remote Unit must be able to support the highest video resolution that the DDC monitor can provide.

2. You must use the same brand and model of mouse on both the local and remote units.
- 

### Computers

The following equipment must be installed on each computer that is to be connected to the system:

- \* A VGA, SVGA, or Multisync card
- \* A 6-pin mini-DIN mouse port
- \* A 6-pin mini-DIN keyboard port

### Cables

For optimum signal integrity we strongly recommend that you use the high-quality Custom KVM cable provided with this package. The shape and function of the KVM connectors on the switch and the cable have been modified so that only KVM cables designed to work with this KVM switch can be used.

Cat 5 cable is the minimum required to connect the local and remote units.

## Operating Systems

---

Supported operating systems are shown in the table, below:

OS		Version
Windows		2000 and higher
Linux	RedHat	7.1 and higher
	SuSE	9.0 and higher
	Mandriva (Mandrake)	9.0 and higher
UNIX	AIX	4.3, 5L (5.2, 5.3)
	FreeBSD	4.2, 4.5
Novell	Netware	6.0 and higher
OS/2		Warp and higher

## OS Languages

English – American

English – UK

French

German

Japanese

Chinese – Traditional

## Components

### (Local Unit) Front View

#	Description	Function
1	Grounding Terminal	The grounding wire (used to ground the unit) attaches here.
2	KVM Port	The KVM cable that links the local unit to your computer plugs in here. Only KVM cables designed to work with this switch can be used.*
3	Remote LED	The Local Unit has two LEDs to indicate the operating status of the Local and Remote units. See <i>(Local Unit)</i> , page 16, for operating status details.
4	Local LED	
5	Operating Mode Selection Switch	Pressing this button toggles between the Local and Remote operating modes. See <i>Operating Modes</i> , page 15, for operating mode details.

**Note:** If you are combining the extender with a KVM switch, the KVM cable connects to the respective ports on the Console section of the switch.

## (Remote Unit) Front View

#	Description	Function
1	Grounding Terminal	The grounding wire (used to ground the unit) attaches here.
2	On Line LED	These LEDs indicate the operating status of the Local and Remote units. See <i>(Remote Unit)</i> , page 16, for details.
3	Power LED	

## Rear View

#	Description	Function
1	Power Jack	The cable from the DC Power Adapter plugs into this jack.*
2	Mouse Port	The console mice plug into these ports.
3	Keyboard Port	The console keyboards plug into these ports.
4	Link Port	The Cat 5 cable that connects the Remote and Local units plug into this connector.
5	Video Port	The console monitors plug into these ports.

**Note:** The NS560UTP/PRO local unit can get its power from the computer external power is only required when the power from the local computer/computers in the KVM installation is insufficient. If you choose to purchase a power adapter for use with the unit, be sure to get one with the same specifications as the one provided in this package for the extender.

## NOTES

## Chapter 2

# Hardware Setup

1. Important safety information regarding the placement of this device is provided on page 17. Please review it before proceeding.
2. Make sure that power to all the devices you will be installing has been turned off. You must unplug the power cords of any computers that have the Keyboard Power On function.

### **Rack Mounting**

---

For convenience and flexibility, the local and remote unit can be mounted on system racks. To rack mount a unit do the following:

1. Unscrew either the two front screws or two rear screws from the bottom panel.

2. Use the screws you just removed to attach the mounting bracket that came with your package to the unit:

3. Screw the bracket into any convenient location on the rack.

## Installation

### Grounding

To prevent damage to your installation it is important that all devices are properly grounded.

1. Use the two grounding wires supplied with this package to ground both units by connecting one end of the wire to the grounding terminal, and the other end of the wire to a suitable grounded object.

2. Make sure that the computer that the local unit connects to and the monitor that the remote unit connects to are properly grounded.

3. See the Grounding Information card that came with this package for proper grounding details.

*(Continues on next page.)*

*(Continued from previous page.)*

4. For increased grounding protection, use STP (shielded twisted pair) cable to connect the local and remote units. There are two methods that can be used:

- a) In addition to the eight paired wires, STP cable also contains a grounding wire. Solder this wire to the RJ-45 connector as shown in the diagram below:

- b) The second method is to use the STP cable shielding for grounding. In this case, make sure that the shielding makes tight contact with the top inside of the RJ-45 connector as shown in the diagram below:

In either case, make sure that the sides of the RJ-45 connector make tight contact with the grounding contacts on the sides of the RJ-45 socket as shown in the diagram below:

## **Connecting Up**

Refer to the installation diagram on the following page (the numbers in the diagram correspond to the numbers of the steps), as you perform these steps:

1. Plug the cables from the local console devices (keyboard, monitor, mouse), into their ports on the rear panel of the Local Unit.
2. Plug the SPHD end of the KVM cable supplied with this unit into the KVM port on the front panel of the Local Unit.

---

**Note:** The shape and function of the connectors on the cable and KVM switch have been modified so that only KVM cables designed to work with this switch can be used.

---

3. Plug the connectors on the other end of the cable into the appropriate ports on the computer (or Console section of the KVM switch - if you are using one). Each connector is marked with an appropriate icon to indicate itself.
4. Plug one end of a Cat 5 or higher STP cable into the local's *Remote I/O* port. Plug the other end of the cable into the remote's Remote I/O port.

---

**Note:** STP cable is not supplied with this package. It requires a separate purchase. The cable can be up to 150 m (500 ft) long.

---

5. Plug the cables from the remote console devices (keyboard, monitor, and mouse), into their ports on the Console side of the remote unit.
6. Plug the power adapter (supplied with this package) into an AC source; plug the adapter's power cable into the Remote Unit's power jack.
7. If you choose to use a power adapter with the local unit, plug the power adapter into an AC source; plug the adapter's power cable into the Local's Power Jack.

---

**Note:** Use of a power adapter with the local unit is optional. Refer to the note regarding the power jack on page 7 for details.

---

## Chapter 3 Operation

### Operating Modes

The NewStar KVM Extender has two operating modes: Local and Remote, as described in the table below:

Mode	Description
Local	Only the local console has KVM (keyboard, video, mouse) access. The remote console's monitor is blank, and the remote console's keyboard and mouse input is disabled.
Local / Remote	Both the local and remote consoles can have KVM access. However, they cannot both have access at the same time. The console without access has to wait until the console with access stops inputting data before it can gain access.

### Mode Selection

The *Operating Mode Selection Switch*, located on the local Front panel, controls the operating mode of the KVM Extender system. Pressing the switch Toggles the system between *Local* and *Local / Remote* operating modes.

## LED Display

The Local and Remote Units have front panel LEDs to indicate their operating status, as shown in the tables, below:

### (Local Unit)

LED	Operating Mode	
	Local	Auto
Local	Lights to indicate that the local console is active (the Remote LED is out).	<p>Lights when the local console is active (the Remote LED is out).</p> <p>Turns off when the remote console is active (the Remote LED turns on).</p> <p>Flashes on and off alternately with the Remote LED when neither console is active.</p>
Remote	The LED is Off	<p>Lights when the remote console is active (the Local LED is out).</p> <p>Turns off when the local console is active (the Local LED turns on).</p> <p>Flashes on and off alternately with the Local LED when neither console is active.</p>

### (Remote Unit)

LED	Indication
Power	<p>Lights steadily to indicate that the connection to the Local Unit is ok.</p> <p>Flashes when there is a problem with the connection to the Local Unit.</p>
On Line	<p>Lights when the remote console is active.</p> <p>Is Off when the local console is active.</p> <p>Is Off when there is a problem with the connection to the Local Unit.</p>

## Appendix

### Safety Instructions

---

#### General

- I** Read all of these instructions. Save them for future reference.
- I** Follow all warnings and instructions marked on the device.
- I** Do not place the device on any unstable surface (cart, stand, table, etc.). If the device falls, serious damage will result.
- I** Do not use the device near water.
- I** Do not place the device near, or over, radiators or heat registers.
- I** The device cabinet is provided with slots and openings to allow for adequate ventilation. To ensure reliable operation, and to protect against overheating, these openings must never be blocked or covered.
- I** The device should never be placed on a soft surface (bed, sofa, rug, etc.) as this will block its ventilation openings. Likewise, the device should not be placed in a built in enclosure unless adequate ventilation has been provided.
- I** Never spill liquid of any kind on the device.
- I** Unplug the device from the wall outlet before cleaning. Do not use liquid or aerosol cleaners. Use a damp cloth for cleaning.
- I** The device should be operated from the type of power source indicated on the marking label. If you are not sure of the type of power available, consult your dealer or local power company.
- I** The device is designed for IT power distribution systems with 230V phase-to-phase voltage.
- I** The device is equipped with a 3-wire grounding type plug. This is a safety feature. If you are unable to insert the plug into the outlet, contact your electrician to replace your obsolete outlet. Do not attempt to defeat the purpose of the grounding-type plug. Always follow your local/national wiring codes.
- I** Do not allow anything to rest on the power cord or cables. Route the power cord and cables so that they cannot be stepped on or tripped over.
- I** If an extension cord is used with this device make sure that the total of the ampere ratings of all products used on this cord does not exceed the

extension cord ampere rating. Make sure that the total of all products plugged into the wall outlet does not exceed 15 amperes.

- I** To help protect your system from sudden, transient increases and decreases in electrical power, use a surge suppressor, line conditioner, or un-interruptible power supply (UPS).
- I** Position system cables and power cables carefully; Be sure that nothing rests on any cables.
- I** Never push objects of any kind into or through cabinet slots. They may touch dangerous voltage points or short out parts resulting in a risk of fire or electrical shock.
- I** Do not attempt to service the device yourself. Refer all servicing to qualified service personnel.
- I** If the following conditions occur, unplug the device from the wall outlet and bring it to qualified service personnel for repair.
  - I** The power cord or plug has become damaged or frayed.
  - I** Liquid has been spilled into the device.
  - I** The device has been exposed to rain or water.
  - I** The device has been dropped, or the cabinet has been damaged.
  - I** The device exhibits a distinct change in performance, indicating a need for service.
  - I** The device does not operate normally when the operating instructions are followed.
- I** Only adjust those controls that are covered in the operating instructions. Improper adjustment of other controls may result in damage that will require extensive work by a qualified technician to repair.
- I** Do not connect the RJ-11 connector marked “UPGRADE” to a public telecommunication network.

## Specifications

Function			LOCAL	REMOTE
Console Selection			1 x Pushbutton	
Connectors	Console Ports	KB	1 x 6-pin Mini-DIN F (Purple)	
		Video	1 x HDB-15 F	
		Mouse	1 x 6-pin Mini-DIN F (Green)	
	KVM Ports		1 x SPHD-15 F	N/A
	Power		1 x DC Jack	
	Unit to Unit		1 x RJ-45	
LEDs	Local		1 (Green)	N/A
	Remote		1 Green)	N/A
	Power		N/A	1 Green)
	On Line		N/A	1 Green)
Emulation	Keyboard/Mouse		PS/2	
Video			1280 x 1024 @ 60Hz (150 m) DDC; DDC2; DDC2B*	
I/P Rating			DC 5.0V; 2.6A	
Power Consumption			DC 5.0V; 1.25W (max.)	
Environment	Operating Temp.		0–50°C	
	Storage Temp.		-20–60°C	
	Humidity		0–80% RH	
Physical Properties	Housing		Metal;	
	Weight		0.33 kg	0.32 kg
	Dimensions (L x W x H)		12.50 x 8.15 x 2.50 cm	

\* DDC, DDC2, and DDC2B support is for the Local monitor only.

## Troubleshooting

Problem	Action
No video	Make sure that all cables are securely plugged into their sockets.
Poor video quality.	The video quality can be improved by reducing the refresh rate.
Trails and smearing on the screen.	Unplug the Cat 5 cable from the remote unit, then replug it.
Local Unit not working	The power from the local computer/computers in the KVM installation may be insufficient. You may need to purchase a power adapter for use with the local unit. Be sure to get one with the same specifications as the one provided in this package for the local units.
Remote Unit not working	Make sure the power adapter that came with this package is properly plugged into the remote unit's power jack.

## Limited Warranty

---

IN NO EVENT SHALL THE DIRECT VENDOR'S LIABILITY EXCEED THE PRICE PAID FOR THE PRODUCT FROM THE DIRECT, INDIRECT, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES RESULTING FROM THE USE OF THE PRODUCT, DISK OR ITS DOCUMENTATION.

The direct vendor makes no warranty or representation, expressed, implied, or statutory with respect to the contents or use of this documentation, and specially disclaims its quality, performance, merchantability, or fitness for any particular purpose.

The direct vendor also reserves the right to revise or update the device or documentation without obligation to notify any individual or entity of such revisions, or update. For further inquiries please contact your direct vendor.
